

## Patterns and trends in UK higher education 2015

### Annexe: Patterns of institutional diversity

This section illustrates some of the key student, staff and finance distributions across higher education institutions in the UK. The finance and staff charts cover the 159 institutions in receipt of funding from the funding councils, plus the University of Buckingham. Staff and finance charts also include figures for the University of Wales (central functions) and Liverpool School of Tropical Medicine. As the University of Wales (central functions) and the Liverpool School of Tropical do not report on students they are not included in institutional charts based on student data or finance ratios featuring student data. Students at Liverpool School of Tropical Medicine are returned in the University of Liverpool student return and the University of Wales (central functions) has no students.

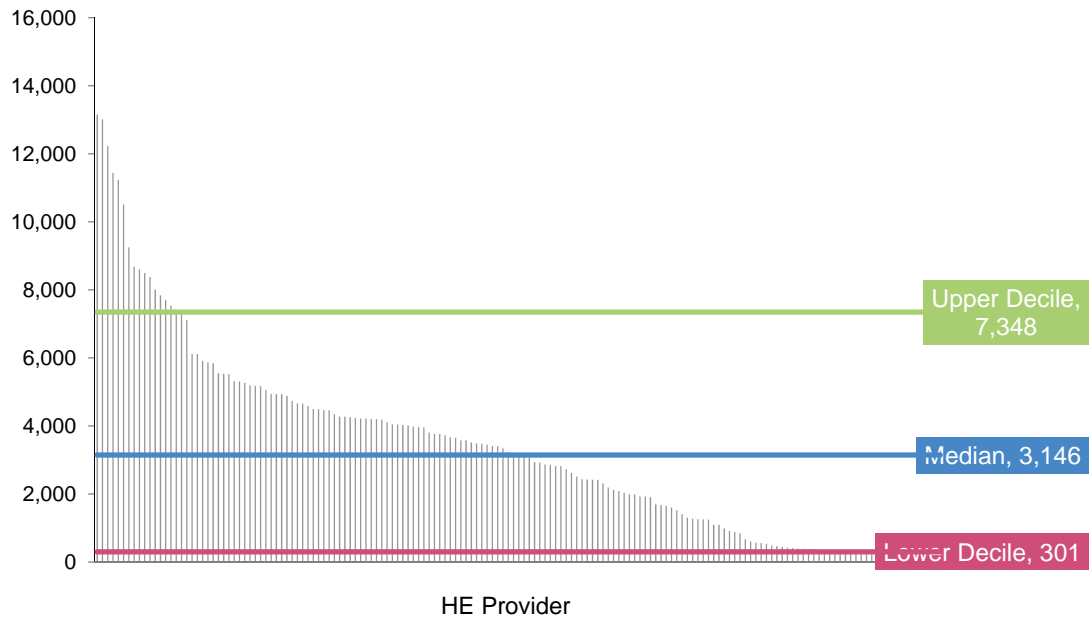

The data is from HESA, student, staff and finance returns for 2013–14, and the Performance Indicators for 2013–14. Charts 3, 30 and 35 each have had one outlier removed; charts 36 and 37 have had two outliers removed; and chart 34 has had three outliers removed. These values have been excluded to make the distribution as a whole more visible in chart form. Please note that any value based on a population of 52 or less has been suppressed.

#### 1. Percentage of postgraduate students by HE provider 2013/14
