A GUIDE TO
PRESENTING
INSTITUTIONAL
FINANCIAL
INFORMATION
TO STUDENTS

Universities UK
Funding and value for money remain prominent in discussions around higher education, with ongoing interest in the level of fees and the financial contributions of students towards the cost of their higher education experience. In addition to increased public interest, students are understandably demanding more information from universities and asking how their fees are being spent. Indeed, a recent survey found that most students do not receive enough information on how universities spend their money.

Universities UK (UUK) have therefore produced this guide for the sector to help address the needs of students and stakeholders. The guide sets out best practice and suggested approaches for universities to consider in presenting this information to students, and has been shaped by the views of students, university staff and key stakeholders in the sector. I would like to thank all the individuals who contributed their time and expertise in supporting its development.

As the guide shows, there are already many good examples of universities presenting this information to students in an accessible and clear way, but we recognise and support a need for further progress.

It is now time for the sector to take the initiative in improving transparency, and for universities to be ambitious in their efforts to explain to students how they are funded, how they spend their money and how this spending adds value to the student experience.

We hope that this guide will help and encourage the sector in making further progress on this issue.
Value for money means different things to different people. For this study the clear focus was to take the perspective of students and consider how best to achieve clarity and transparency about consistent financial information that will help students understand where their fees go.

The British Universities Finance Directors Group (BUFDG) was delighted to be asked to work with UUK to support some of the workshops held as part of this project. Alongside strategic planners, student communications experts and other colleagues, we sought to find some pragmatic answers to the challenges raised. A number of my Finance Director colleagues took part in the events and I would like to personally thank them for their time and support.

The resulting guide is practical and constructive and will be a useful contribution to the wider debate. We look forward to seeing rapid progress in how this information is presented by institutions.
ABOUT THIS GUIDE

In recent years there has been increased interest from students, the government and scrutiny in the media about the income that universities receive, and how they spend this income. Universities understand that today’s students are keen to know more about university finances and in particular about how their fee income is spent, but to date accessible and easy-to-comprehend information has not been consistently available across the sector.

UUK has developed this best practice guide to support and encourage higher education providers to better present information to students on how they use fee income, and other sources of income, and how their spending adds value to the student experience.

This guide:

- looks at how information on university spending is currently communicated to students
- provides a framework for presenting information on income and spending to students, including examples of best practice and suggested approaches

It is also designed to support institutions in England in demonstrating to the Office for Students (OfS) that they meet its requirements for providing transparency about value for money for students and taxpayers.

This guide also signifies a call for action to the sector, encouraging providers to be more proactive in increasing the coverage, accessibility and visibility of this information for students. UUK aims to review progress on the presentation of information on income and spending to students in a year’s time.

To inform this guide, we gathered feedback from a series of workshops with students and those working in institutions with an interest in this area. We considered existing evidence on this issue, held interviews with relevant stakeholders and took advice from the UUK value for money advisory group.

We would like to thank all those individuals who contributed their time and expertise to support the development of this guide.
CURRENT STATE OF PLAY

There is a clear demand among students across the UK for more accessible information on how fees are spent, and there is an increasing interest in improving the transparency of information about universities’ income and spending from wider stakeholders.

While there has been improvement in recent years, including good examples of universities explaining how they spend their fee income, further work is needed.
1. Most students feel they do not get enough information on how fees are spent

Despite improvements in recent years, in 2019, 76% of students surveyed in England, 72% in Wales, 73% in Northern Ireland and 67% in Scotland reported that their university does not provide enough information on university spending.²

2. The higher education sector can do more to improve provision of information on income and spending to students

While there are good examples of universities explaining how they spend their income, further improvement is needed. It is estimated that around 80% of university websites do not provide information that is easily accessible and tailored to students, with a wide variation in approaches taken.³
3. A lack of information on how fees are spent is shaping student perceptions of value for money

While positive student views on the value for money of university education are often linked to teaching quality, course content, facilities or campuses, negative views are often linked to fees and a lack of understanding in how they are spent.\(^4,5\)

4. Providing information will help to address misperceptions around how fees contribute to university spending

The lack of accessible information on university spending has led to a misperception that fees are solely spent on the direct costs of teaching.\(^6\)
This framework provides an approach for institutions to consider in presenting information on income and spending, including as part of a value for money statement.

Institutions should engage closely with their students to identify the best ways to present and communicate information that is accessible, accurate, relevant and meaningful.

In providing breakdowns of income and spending, it is suggested that institutions should draw on their most recent financial data as returned to HESA, based on audited financial statements per the Statement of Recommended Practice, to minimise administrative burden.
THE THREE STRANDS OF A VALUE FOR MONEY STATEMENT

<table>
<thead>
<tr>
<th>Income generated</th>
<th>Income expended</th>
<th>Institution specific narrative</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Categorise and describe total income of institution</td>
<td>● Categorise and describe total expenditure of institution</td>
<td>● Give institution-specific context around income and expenditure (eg how academic environment is supported by spending)</td>
</tr>
<tr>
<td>● Meaningfully indicate and describe income categories</td>
<td>● Meaningfully indicate and describe areas of expenditure</td>
<td>● Describe how non-teaching spending benefits and adds value for students</td>
</tr>
<tr>
<td>● Place income from fees in the wider context of other sources (eg government grants) that together fund university activity and the student experience</td>
<td></td>
<td>● Highlight unique opportunities for students that may not be reflected in spending data (eg study abroad opportunities or work placements)</td>
</tr>
</tbody>
</table>

A mock online value for money statement based on this approach is available at universitiesuk.ac.uk/value-for-money-statement
Specific issues and approaches providers may want to consider include:

- Highlighting the institution’s charitable status and explaining that any surpluses are reinvested to enhance the student experience (depending on the institution’s financial circumstances).
- Highlighting non-fee income sources that contribute to enhancing the student experience (e.g., endowments and investments).
- Giving simple explanations of how the student funding system works, for example, that fee loans are only repaid when earning above a certain amount.
- Avoiding technical and overly granular approaches, presenting data in accessible, concise formats.
- Using clear, accessible terminology, preferably tested with students, and based on common categories of the audited financial statements institutions return to HESA.

Institutions may also want to consider explaining, through narrative sections, areas of spending that benefit students which will not be evident in the data. Examples include:

- Investment in new buildings or facilities; given that these longer-term projects could benefit future students more than current ones, the narrative could explain past investments and how they are benefiting current students.
- Spending on access and outreach; the narrative section could provide specific examples of an institution’s access work.
- Spending on partnerships with industry, and the benefits this can bring in terms of graduate employability.
- Spending to improve environmental sustainability.
- Investment in student and staff facilities, such as sports, health services, careers advice.
- Explaining risks currently facing the sector, associated with uncertain economic and political environment, and how the institution is working to mitigate them.
- Demonstrating ethical investment and ethical sources of income.
- Investment in research, and how this benefits students, for example, providing access to new technologies or being taught by prominent researchers.

Institutions may also want to consider explaining, through narrative sections, areas of spending that benefit students which will not be evident in the data.
COMMUNICATING INFORMATION TO STUDENTS

It is critical that institutions engage closely with their students to ensure that information about income and spending is as accessible, engaging and meaningful as possible. Approaches institutions may want to consider include:

- top-level information on income and spending displayed prominently on websites, which are easily accessible to students, with links to more detailed information
- providing value for money statements, including information on income and spending, as part of the student application process (eg in prospectus)
- providing information in student portals, or any student facing mobile applications
- ensuring early awareness of information by including information as part of welcome packs or induction activities
- publicising visual information on income and spending on campus poster boards and digital screens across campuses
- sharing graphics on income and spending and value for money statements within social media groups organised for current students
- including regular updates within student newsletters
- including information from value for money statements in strategic plans. While not as directly relevant to students this would increase prominence of information to staff
- engaging regularly with students and students’ unions to ensure accessibility and usefulness of this information is maximised
CHECK LIST

- Engage closely with students, and student representatives, to ensure that the information you provide is meaningful and tailored to specific student groups and circumstances at your institution.

- Information on income and spending should be clear, easy to understand and use non-technical descriptions that are familiar to students.

- Provide definitions and descriptions for terminology that may be unfamiliar to students.

- Use visual approaches that minimise clutter, with clear and meaningful categories and descriptions.

- Provide links to more detailed information on university finances, eg financial statements.

- Explain how income from non-fee sources is used to benefit students.

- Provide narrative context to data on income and spending, and explain how funding decisions deliver value to students.

- Present this information on areas of your websites where students are likely to see it.

- Consider additional approaches to best communicate information to prospective and current students.

- Seek to address frequently asked questions that your students may have in relation to spending.
EXAMPLE APPROACH TO CATEGORISING INCOME AND EXPENDITURE SOURCES

As a starting point, institutions may want to consider the following approach to categorising income and spending sources, developed by Universities UK.

This can be recreated from publicly available HESA data on HE provider finances

Universities’ 2017–18 income by activity

- **18.1%** Other income
- **2.1%** Endowment and investment
- **7.9%** Research – other sources
- **6.7%** Other UK and EU student fees*
- **13.3%** Non-EU student fees
- **7.7%** Government grants for teaching
- **13.1%** Government grants for research
- **2.7%** Other Government grants
- **28.2%** UK and EU undergraduate student fees

Total income £38.2 billion

*including postgraduate and further education
HESA categories (HESA HE Provider Data: Finance, tables 6 and 7)

Government grants for teaching

<table>
<thead>
<tr>
<th>Recurrent teaching</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>England</strong>: HEFCE/OfS – teaching grant, NCTL/DFE funding; <strong>Wales</strong>: Teaching grant – full-time UG provision (including PGCE and premia and per capita funding), Teaching grant – full-time PG provision (including premia and per capita funding), Teaching grant – part-time UG provision (including premia and per capita funding), Teaching grant – part-time PG provision (including premia and per capita funding); <strong>Scotland</strong>: General fund teaching; <strong>Northern Ireland</strong>: Recurrent (teaching)</td>
</tr>
</tbody>
</table>

Grants for further education provision

<table>
<thead>
<tr>
<th>England</th>
<th>Wales</th>
<th>Scotland</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESFA funding;</td>
<td>DfES recurrent grants;</td>
<td>Grants for FE provision</td>
</tr>
</tbody>
</table>

Source of fees – DH/LETB/Scottish Health Directorate

Government grants for research

<table>
<thead>
<tr>
<th>Recurrent research</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>England</strong>: HECFCE/Research England – research grant; <strong>Wales</strong>: QR and PGR funding; <strong>Scotland</strong>: General fund research and knowledge exchange; <strong>Northern Ireland</strong>: Recurrent (research)</td>
</tr>
</tbody>
</table>

Research Councils

UK central government bodies/local authorities, health and hospital authorities

UK central government tax credits for research and development expenditure

Other government grants

<table>
<thead>
<tr>
<th>Recurrent other</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>England</strong>: HECFCE/OfS/Research England – other grants; <strong>Wales</strong>: Non formula funding grant; <strong>Scotland</strong>: Strategic funds, Ring-fenced grants; <strong>Northern Ireland</strong>: Recurrent – other (including non-recurrent special funding)</td>
</tr>
</tbody>
</table>

Capital grants recognised in the year

<table>
<thead>
<tr>
<th>England</th>
<th>Wales</th>
<th>Scotland</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capital grants recognised in the year;</td>
<td>Capital grants recognised in the year – equipment, Capital grants recognised in the year – estates;</td>
<td>Capital grants recognised in the year, SFC capital maintenance grant; <strong>Northern Ireland</strong>: Capital grants recognised in the year</td>
</tr>
</tbody>
</table>

UK and EU undergraduate student fees

<table>
<thead>
<tr>
<th>UK and Other EU full-time UG (SLC/LEAs/SAAS/DFE(NI) and Other)</th>
<th>UK and Other EU part-time UG (SLC/LEAs/SAAS/DFE(NI) and Other)</th>
</tr>
</thead>
</table>

Fees from non-EU students

Total Non-EU student fees
### Other UK and EU student fees (including postgraduate and further education)

- Full-time PG
- Part-time PG
- Non-credit-bearing course fees
- FE course fees
- Income for general research studentships from charities (open competitive process)
- Other research training support grants

### Research – other sources

- UK-based charities (open competitive process)
- UK-based charities (other)
- UK industry, commerce and public corporations
- EU government bodies
- EU-based charities (open competitive process)
- EU industry, commerce and public corporations
- EU other
- Non-EU-based charities (open competitive process)
- Non-EU industry, commerce and public corporations
- Non-EU other
- Other sources

### Endowment and investment

- Total donations and endowments
- Investment income

### Other income (including business and residencies and catering activities)

- Other services rendered (UK central government/local authorities, health and hospital authorities, EU government bodies)
- Other services rendered (other)
- Residences and catering operations (including conferences)
- Grants from local authorities
- Income from health and hospital authorities (excluding teaching contracts for student provision)
- Other grant income
- Income from intellectual property rights
- Other operating income
Universities’ 2017–18 expenditure by activity

- **6.3%** Other expenditure
- **5%** Accommodation and conferences
- **11.4%** Maintaining campuses
- **3.3%** Student and staff facilities
- **3.5%** Financial support to students and outreach
- **7.5%** Administration and central services
- **9.2%** Libraries, IT and museums

Total expenditure £37.2 billion

HESA categories *(HESA HE Provider Data: Finance, table 8)*

Teaching and research

- Total academic departments
- Total research grants and contracts
- Other general expenditure
  - Academic staff spending from ‘Other expenditure’,
  - Remove spending on outreach (based on institutional data sources) and transfer to ‘Financial support to students and outreach’
<table>
<thead>
<tr>
<th>Libraries, IT and museums</th>

PARTICIPANTS

To inform this work, UUK conducted interviews with the following institutions:

- *Cardiff University* (vice-chancellor)
- *Falmouth University* (finance director)
- *University of Northampton* (vice-chancellor)
- *University of Nottingham* (vice-chancellor, finance director)
- *University of Reading* (press office)

In addition, UUK spoke to HESA, HESPA and the OfS to gain additional perspectives on this work.

UUK held student or stakeholder workshops at the following institutions:

- *University of Cumbria*
- *Durham University*
- *Keele University*
- *University of Nottingham*

The stakeholder workshops were attended by finance directors, strategic planners and other stakeholders from across the region where the workshop was held. UUK also hosted a workshop in London, which was attended by a range of stakeholders.

Finally, UUK consulted with the vice-chancellor value for money advisory group, which was comprised of the following members:

- Professor David Phoenix OBE
  *London South Bank University* (Chair)
- Professor Stuart Corbridge
  *Durham University*
- Professor Karen Cox
  *University of Kent*
- Professor Stuart Croft
  *University of Warwick*
- Professor Geoff Layer
  *University of Wolverhampton*
- Professor Trevor McMillian
  *Keele University*
- Professor Julie Mennell
  *University of Cumbria*
- Professor Clive Mulholland
  *University of the Highlands and Islands*
- Professor Nick Petford
  *University of Northampton*
- Professor Colin Riordan
  *Cardiff University*
- Professor Mark Smith CBE
  *Lancaster University (University of Southampton from October 1)*
- Professor Steven Spier
  *Kingston University*
- Professor Shearer West
  *The University of Nottingham*

We would like to thank all these individuals and institutions for their time and expertise in supporting the development of this guide.

3. UUK analysis of a random representative sample of 45 higher education provider websites in Winter 2018
Universities UK is the collective voice of 136 universities in England, Scotland, Wales and Northern Ireland. Our mission is to create the conditions for UK universities to be the best in the world; maximising their positive impact locally, nationally and globally. Universities UK acts on behalf of universities, represented by their heads of institution.
